**Job Announcement**

**Technical Advisor, Malaria Treatment, (Sierra Leone, Ghana, Kenya, Zambia, and Cameroon )**

The International Division of Medical Care Development, MCDI was founded in 1977 with the belief that MCD's successful approach to health systems development in the rural United States could be adapted to meet the needs of developing nations. A global non-profit organization, MCDI uses practical, evidence-based and high-impact approaches to strengthen health systems in developing countries. For almost 40 years, MCDI has worked to improve the health of vulnerable populations overseas through integrated, sustainable and locally-driven interventions. MCDI has implemented public health programs in over 40 countries aimed at targeting the world's most vulnerable populations. MCDI collaborates with donors, national governments, the private sector, health agencies, communities and local stakeholders to improve health and save lives in the following areas: malaria control; maternal, neonatal and child health; water, sanitation and hygiene; tuberculosis; HIV/AIDS; and other communicable diseases.

Technical Advisor for the treatment of malaria will be responsible for ensuring technical rigor on the implementation of malaria service delivery activities in the assigned country and liaise with and maintain productive collaborative relationships with in-country partners such as 1) Advance the Progress of Malaria Service Delivery Consortium (PSI/MCDI/Jhpeigo/ UCSF/Global Health and Sciences/ MEI; 2) PMI/Country team and other PMI implementing partners; 3) Ministry of Health/National Malaria Control Program and other departments; 4) other stakeholders working in malaria, such as local NGOs, private sector representatives, WHO country office, etc.

We are looking to hire technical advisors for the following countries: Sierra Leone, Ghana, Kenya, Zambia, and Cameroon.

**Essential Job Functions:**

This position is contractual for one to five years depending on the needs expressed by USAID and reports to the MCDI Project HQ Country Backstopping team.

**Local Office program backstopping for MCDI's portfolio of malaria projects:**

He/she may serve as the primary programmatic backstop for MCDI malaria projects in his/her country of assignment leading and guiding strategic planning, program design, program monitoring and evaluation, work plan development, budget managements, local logistics including TDY visits and virtual support

during weekly or bi-weekly teleconference and through regular activity reports, semi-annual and annual report and publications.

#### **MCDI's Technical Assistance in the treatment of malaria:**

She/he will provide MCDI with local-based technical leadership on malaria treatment, clinical supportive supervision and quality assurance/quality control on malaria case management. This technical assistance includes (among others) the provision of technical assistance to Home Office and field teams, provide technical assistance to the MOH/NMCP on malaria case management, provide training, develop SOPs, manuals, training materials, participate in manuscript preparation, semi-annual and annual reporting, represent MCDI in regional and global technical working groups and consortia, promotion of MCDI's capabilities with potential collaborating partners, and disseminating MCDI's malaria experience to global audiences.

#### **Other Functions:**

Other functions will include, but not necessarily be limited to:

- Assist in the dissemination of the malaria case management (diagnostic and treatment) policy
- Track and report on accomplishment of activities in the workplan
- Submit weekly written /or verbal (during weekly calls) updates on the work undertaken under each of the areas described above, significant achievements, challenges, and plans for the coming week.
- Provide Case Management training and continued adaptation of materials for the enhanced clinical case management supervision process: Materials for the malaria case management supervision process, based on mentoring concepts, will be drafted and vetted as needed with the NMCP.
- Identify barriers to care-seeking behavior and options for community-based service delivery.

#### **Qualifications/Requirements:**

- Medical Doctor Degree or Master's degree in related fields such as Nursing or Pharmacy.
- At least 10 years of professional experience in malaria case management, diagnosis, prevention, control and/or elimination, either in an academic, research and/or program setting.
- Experience working with malaria donors such as USAID/PMI, World Bank, Global Fund, DFID is preferred
- Experience in project management, managing staff and resources, mostly provided by malaria donors, and experience in executing academic, research or field implementation programs.
- Experience in writing scientific report, manuscript and peer-reviewed publications.
- Good interpersonal skills, team player and available as needed
- Excellent written and oral communication skills,
- General professional proficiency in the French language is preferred.

- Very proficient in the use of the standard Microsoft Office package with particular experience using Words, Excel, PowerPoint and Internet Explorer.

Interested candidates should submit a letter of interest and curriculum vitae to [mcdijobs@mcd.org](mailto:mcdijobs@mcd.org). Compensation will be based on USAID FSN scales. Positions will be open until filled.
